electronic stability control (ESC)

With understeer control and traction control, this helps to maintain vehicle control in "critical" driving conditions (obstacle avoidance, loss of grip when cornering, etc.).

hill start assist

Combined with ESC, hill start assist maintains brake pressure automatically for 2 seconds to give you time to lift your foot from the brake pedal and press the accelerator. The system activates when the slope exceeds 3%.

features & equipment

driving and safety

- driver's front airbag
- electronic stability control (ESC) with hill start assist

comfort

- automatic front headlight illumination
- overhead storage/glovebox with lid
- electric front windows
- 12 V socket in central console

exterior design

- 15" kijaro medium wheel trims

professional features

- 6 rotating leashing rings on the floor
- solid panelled partition with window
- panelled asymmetrical rear doors
- Right-hand panelled sliding side door

(1) depending on driving style. (2) Fuel consumption and CO₂ emissions are certified using a standard, regulatory method. It is identical for all manufacturers and allows vehicles to be compared. (3) WLTP (Worldwide Harmonized Light Vehicle Test Procedures): this new protocol provides results much closer to those found in daily use compared to the NEDC protocol.
