

Pure energy and progressive performance

Audi RS e-tron GT

Progress you can feel

A new dimension of RS.

The power delivery that the Audi RS e-tron GT offers with its fully electric quattro all-wheel drive is impressive. With an electric drive on both the front and rear axles, when necessary it can deliver up to 440 KW of power or for a brief period with boost up to a maximum of 475 KW.

Lighting the way to dynamic progress

The matrix LED headlights with Audi laser light are a fundamental aspect of a progressive design language. One unmistakable statement is the striking light signature with the blue X element of the Audi laser light, from where the dynamic light sequencing sees a wave of light extend horizontally.

Pure energy and
progressive performance

The image shows the interior of an Audi RS e-tron GT, focusing on the dashboard and center console. The dashboard is a wide, horizontal panel with a textured, carbon-fiber-like finish. On the left side, there is a digital display showing various vehicle settings and icons for 'MEDIA', 'TELEPHONE', 'NAVIGATOR', 'MY CAR', 'FAVORITES', and 'SETTINGS'. The center console is also visible, featuring a gear selector and handbrake. The overall design is sleek and modern, emphasizing a minimalist and functional aesthetic.

Focused on aesthetic driving dynamics

In the Audi RS e-tron GT, everything is focused on the functional center of the interior: the driver's position. The pared-back cockpit with fully digital 12.3-inch color display and the center console are ergonomically oriented to the driver. Sport seats provide good lateral support even while cornering at speed. The materials used in the interior are an expressive demonstration of progress.

A close-up, low-angle shot of a car's interior dashboard. The dashboard is dark, possibly black or dark grey, with a prominent carbon fiber texture. In the upper right portion of the frame, the word "e-tron" is illuminated in a bright red, glowing font. The lighting is dramatic, with strong highlights and deep shadows, creating a sense of depth and luxury. The overall aesthetic is modern and high-tech.

Drivetrain / transmission

Peak electrical output	440 kW
Peak electrical output boost	475 kW
Electrical torque output	830 Nm
Drive type	quattro All-wheel drive with controlled rear differential lock
Transmission type	2-speed / automatic

Battery

Battery type	Lithium-Ion
Gross / net battery capacity	93.4 / 83.7 kWh

Performance / range

Top speed	250 km/h
Electrical acceleration boost, 0-100 km/h	3.3 s
Electrical range, combined according to WLTP	495 - 447 km
Electric power consumption, combined according to WLTP /100 km	22.1 - 19.8 kWh

Charging equipment

Charging time DC 5-80%	22.5 min
Second charging access	•
On-board charger (AC)	Up to 22 kW
Mode 3 charging cable for public charging (AC)	22 kW
Vehicle inlet CCS type 2	•
400-Volt boost converter	•

Exterior

Black Appearance package

Singleframe in body color

Exterior mirror housings in body color

Exterior mirrors, power-adjustable, heated and power-folding, auto-dimming on both sides, with memory feature

Wheels, 5-double-spoke concave module style with graphic print, Black, 9.5J|11.5J x 21, 265/35|305/30 R21 tires

Tires 265/35 R21 101Y in front tires 305/30 R21 104Y in rear

Steel brakes with tungsten carbide coating and Red brake calipers
